

# ClockWatch® Enterprise

## For Centralized Control

ClockWatch® Enterprise is Beagle Software's solution for larger networks, and/or networks that require centralized control. Enterprise can be bundled with ClockWatch® Pro to become the network's time server. Enterprise then sets the correct time on each registered client. This solution involves installing ClockWatch® Enterprise and ClockWatch® Pro on any computer on the network, as well as a small software module each client.

## ClockWatch® Enterprise offers:

- **Synchronization:** Sets clients within 250 milliseconds of time server.
- **Secure:** Clients run the module as a service or as an application.
- **Simple:** No user interaction by the client is necessary.
- **Flexible:** Options for periodic, daily, and weekly scheduled time synchronization, as frequently as every five minutes.
- **Useful:** Time Set (if necessary) and Force Time (unconditionally) time setting options.
- **Powerful:** Graphic representation of client accuracy shows individual or network performance. Also allows X-10 device control to establish remote management of all peripherals on the network.
- **Accurate:** Integrated with ClockWatch® Pro to keep the time server set correctly.
- **Compatibility:** Works with ClockWatch® Star Sync and Radio Sync for alternate synchronization options.

System Compatibility: Windows® 9x/NT/2k/XP/2003

## ClockWatch® Enterprise

(CWEnt)

**\$249.95**

Enterprise is the central control console intended for time server installation. Any computer on the network may be the server. The server should have Internet or modem access to sync time, or combine with ClockWatch® Star Sync or Radio Sync for alternate synchronization.

Compatible with Beagle Software's ClockWatch® Server, Star Sync, Radio Sync, ClockCard and DocuClock.

## Enterprise Starter Pak

(CWEntPak)

**\$249.95**

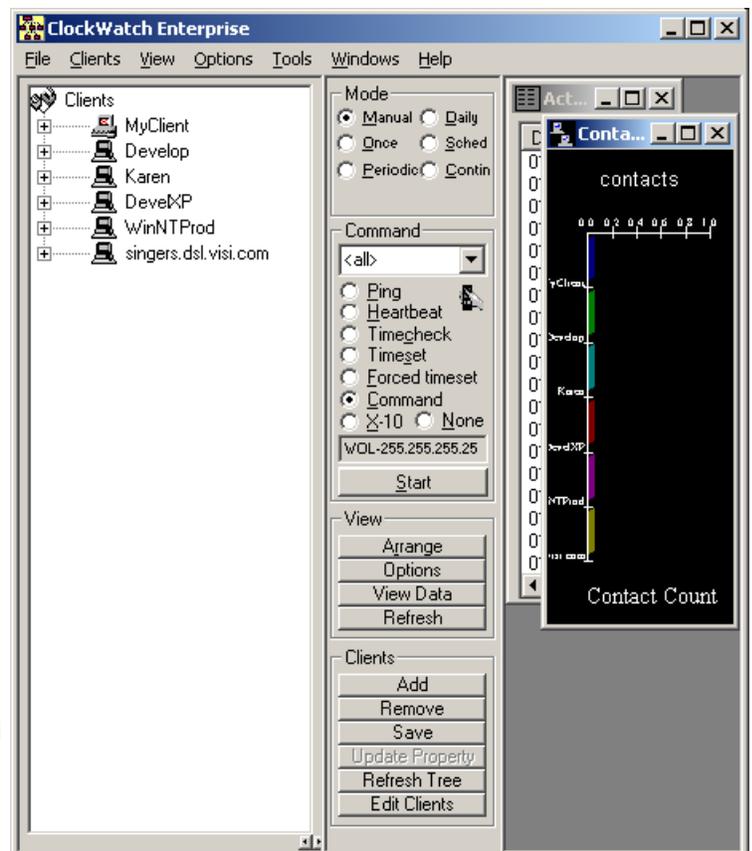

Includes Enterprise, 10 client modules, and ClockWatch® Pro. A \$355 value!

## Client Service Module

(CWMod)

**\$7.50**

A software module installation is required on each client for time setting. The client user does not control this module. Requires ClockWatch® Enterprise installation on the network.
