

# ClockWatch Sentry

Prevents unauthorized users from changing the system date or time

ClockWatch Sentry has all the time setting smarts of [ClockWatch Pro](#) with the special added security of [Clock Locking](#). This unique clock locking feature allows you to lock down the date and time on any Windows computer.

Whenever an unauthorized user tries to change the date or time, ClockWatch Sentry blocks the change and logs the attempt. Someone trying to change the time from the Control Panel or another application won't be able to change either the date or the time of the computer.

ClockWatch Sentry is ideal for averting potential fraud or tampering situations, such as electronic timecards or other computer time stamped events. If you are looking for a time stamp with atomic clock accuracy consider our [DocuClock](#).

## ClockWatch Sentry sets time to the Atomic Clock and keeps it set! Clock Locking :

- Provides security for time critical applications
- Blocks changes in time or date
- Logs all attempts at changing or falsifying date or time
- Administrator maintains password protected access
- Restricts date/time access on Windows 95/98/Me
- Works with all versions of Windows (95/98/Me/NT/2k/XP)

### Time Synchronization:

- Makes your computer a precision time keeper by synchronizing its clock with the US Cesium Atomic Clock, the world's most accurate clock.
- Ensures that your system clock doesn't drift over time.
- Has options for manual or automated time setting.
- Allows Internet or direct modem dial-up connection to a wide variety of timeservers.

### Targeted Industries/Applications:

- Time & attendance systems
- Time card, punch clock and time stamp applications
- Security or access applications
- Gaming industry

To synchronize and protect a network see [ClockWatch Client/Server](#).
